

STEPS FOR CHANGING THE DEFAULT NUMBER FORMAT FOR A MEASURE

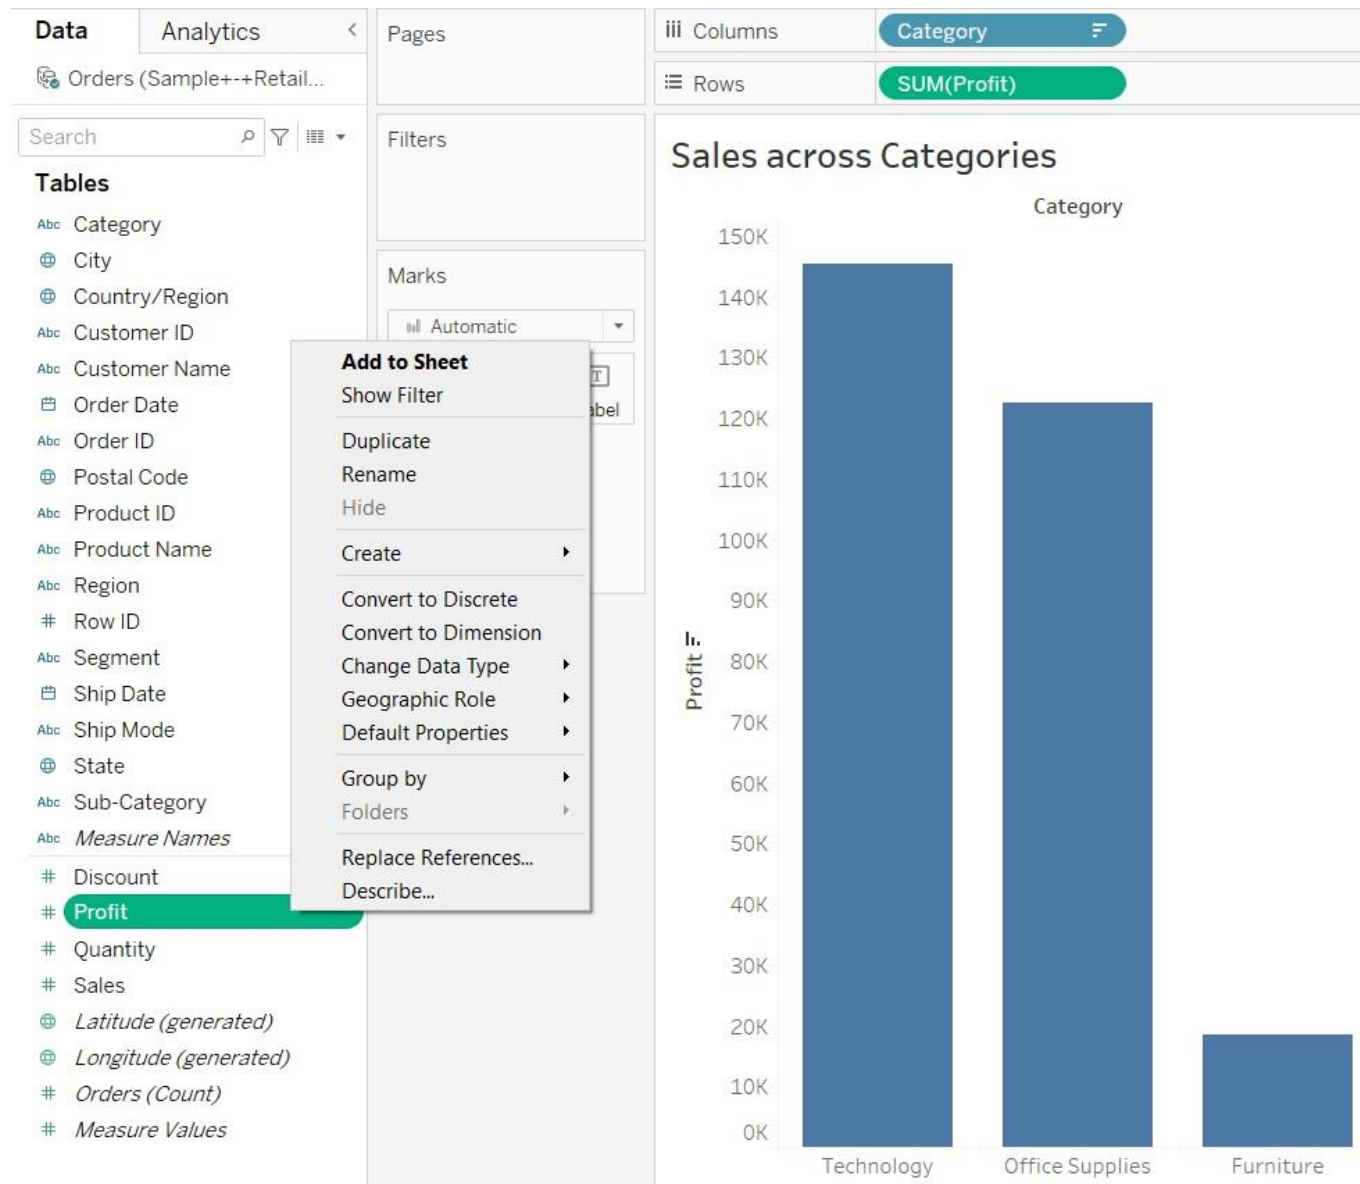

STEP 1: By default, the **SUM(Profit)** is not shown in currency format

STEP 2: Click on the data field (i.e., **Profit**) in the Data Pane section

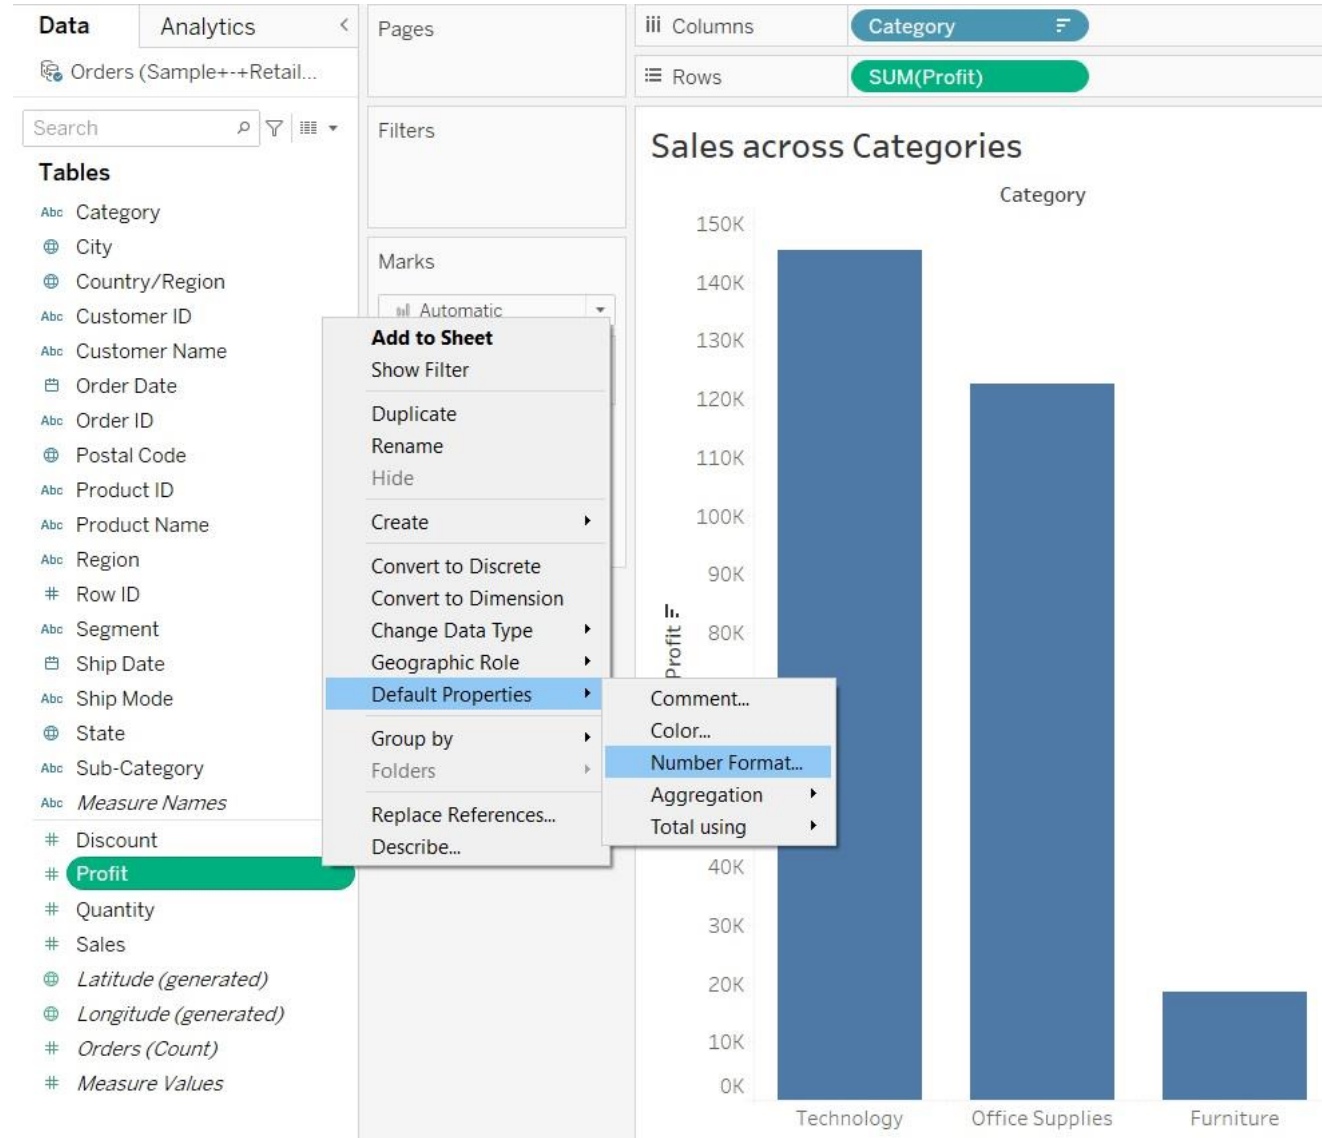

STEP 3: Right-click the data field (i.e., Profit)

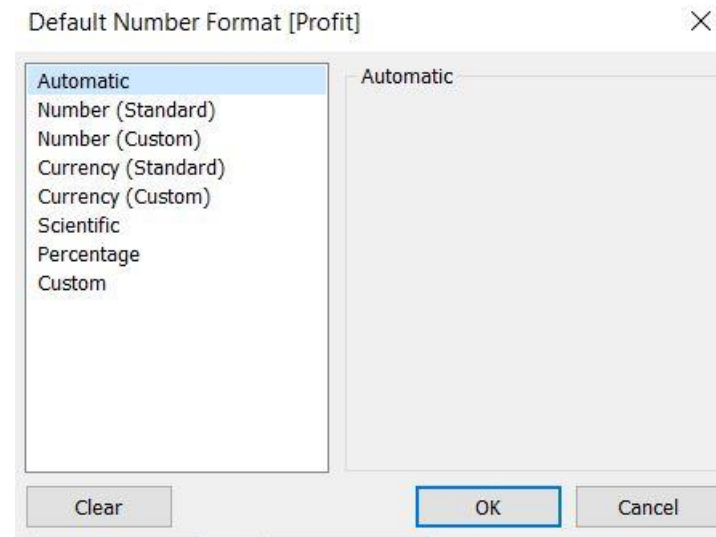

STEP 4: Select the "Default Properties"

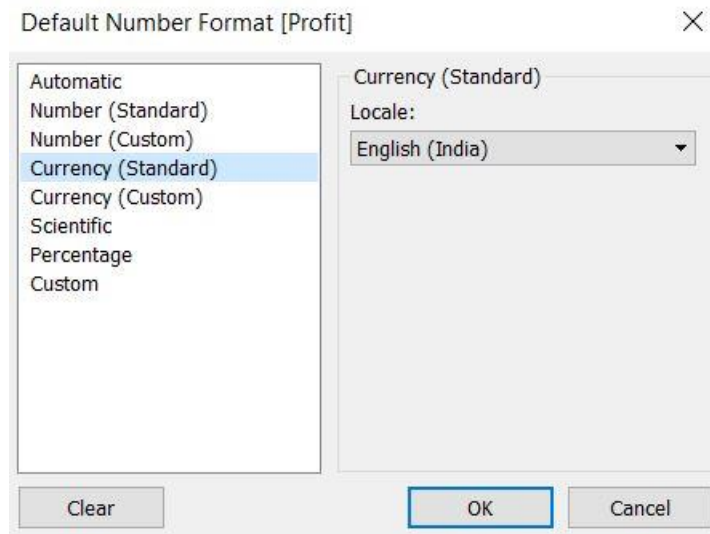

In that menu select the "Number Format..."

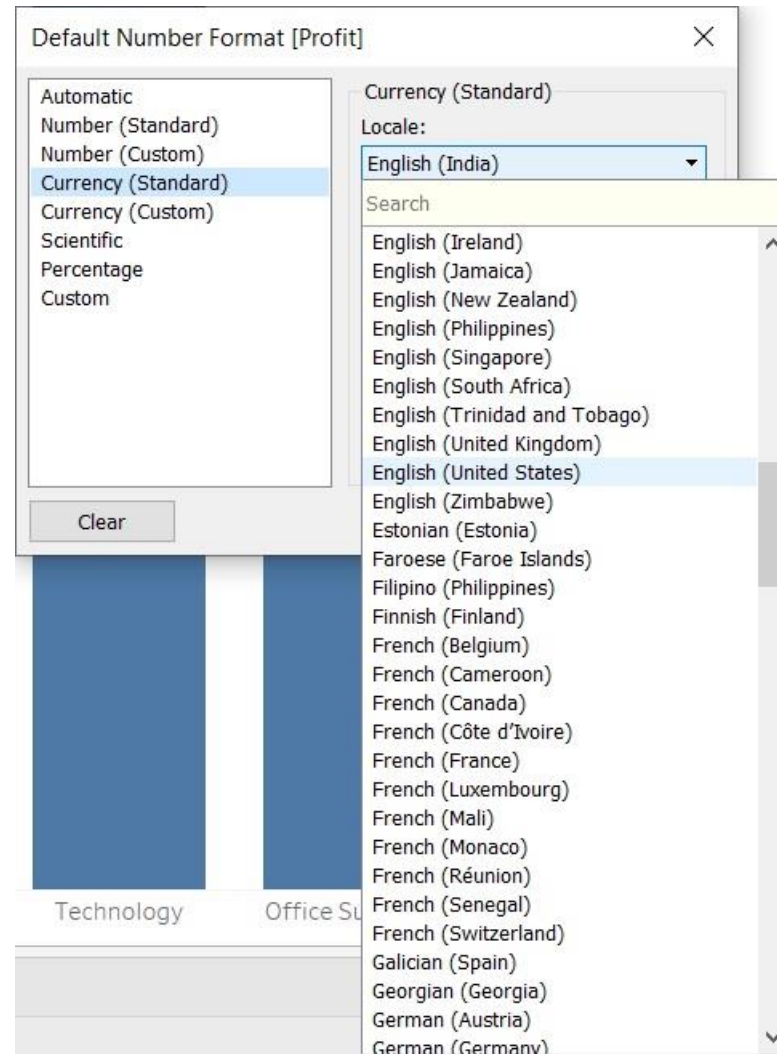

STEP 5: A “Default Number Format” box will be displayed

STEP 6: Select the "Currency(Standard)"

STEP 7: From the drop-down for "**Locale:**" select the required currency format e.g.: **English (United States)**

STEP 8: Select the "Currency(Custom)"

Default Number Format [Profit] ✕

Automatic	Currency (Custom)
Number (Standard)	Decimal places:
Number (Custom)	2
Currency (Standard)	Negative values:
Currency (Custom)	(\$1234)
Scientific	Display Units:
Percentage	None
Custom	Prefix / Suffix:
	\$
	<input checked="" type="checkbox"/> Include thousands separators

Clear OK Cancel

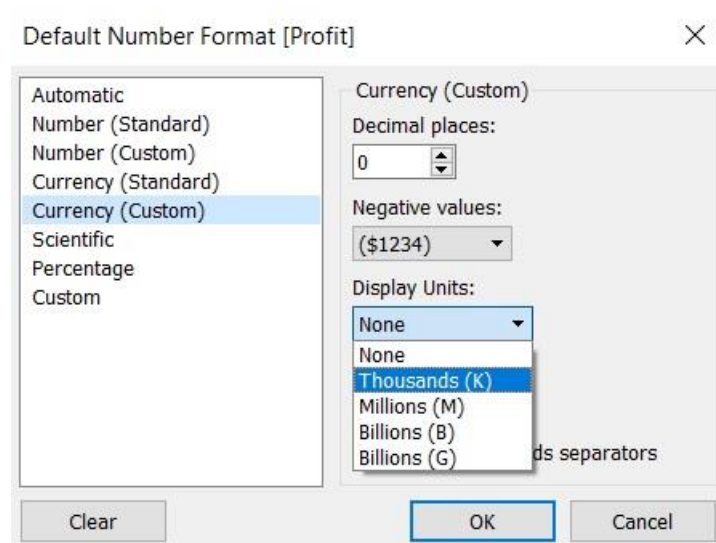

STEP 9: Ensure that the required number of decimal places is mentioned in "**Decimal places:**" section

Default Number Format [Profit] ✕

Automatic	Currency (Custom)
Number (Standard)	Decimal places:
Number (Custom)	0
Currency (Standard)	Negative values:
Currency (Custom)	(\$1234)
Scientific	Display Units:
Percentage	None
Custom	Prefix / Suffix:
	\$
	<input checked="" type="checkbox"/> Include thousands separators

Clear OK Cancel

STEP 10: If you are aware of the range of the measure,
select the required units in "**Display Units**" e.g.: Thousands (K)

STEP 11: Ensure that the updated number format is now visible in the Profit Axis
