

# STEPS FOR CHANGING THE DEFAULT AGGREGATION FOR A MEASURE

## METHOD-I: IN THE VIEW AREA (WITH THE MEASURE PILL IN EITHER ROWS OR COLUMNS OF THE VIEW)

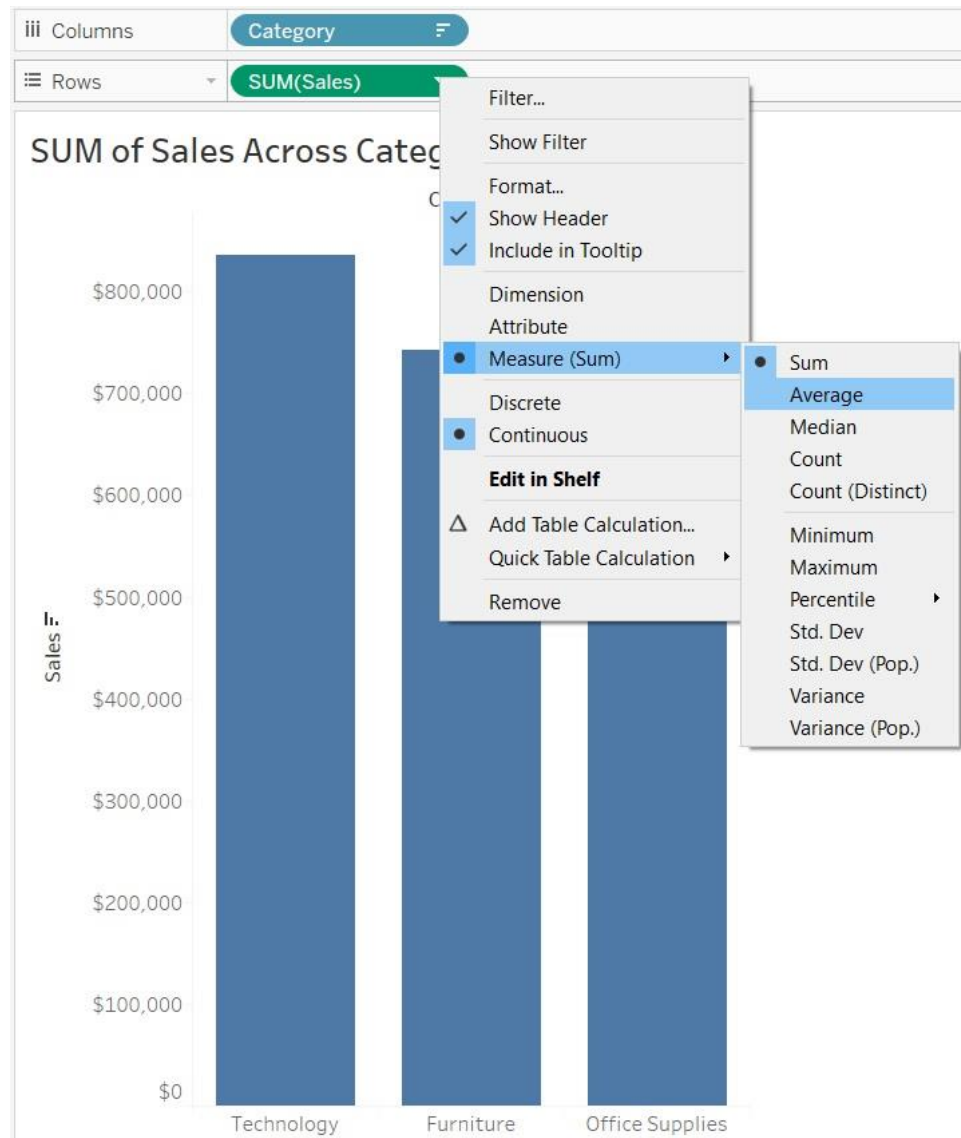

**STEP 1:** By default, the aggregation for sales will be **SUM(Sales)**.

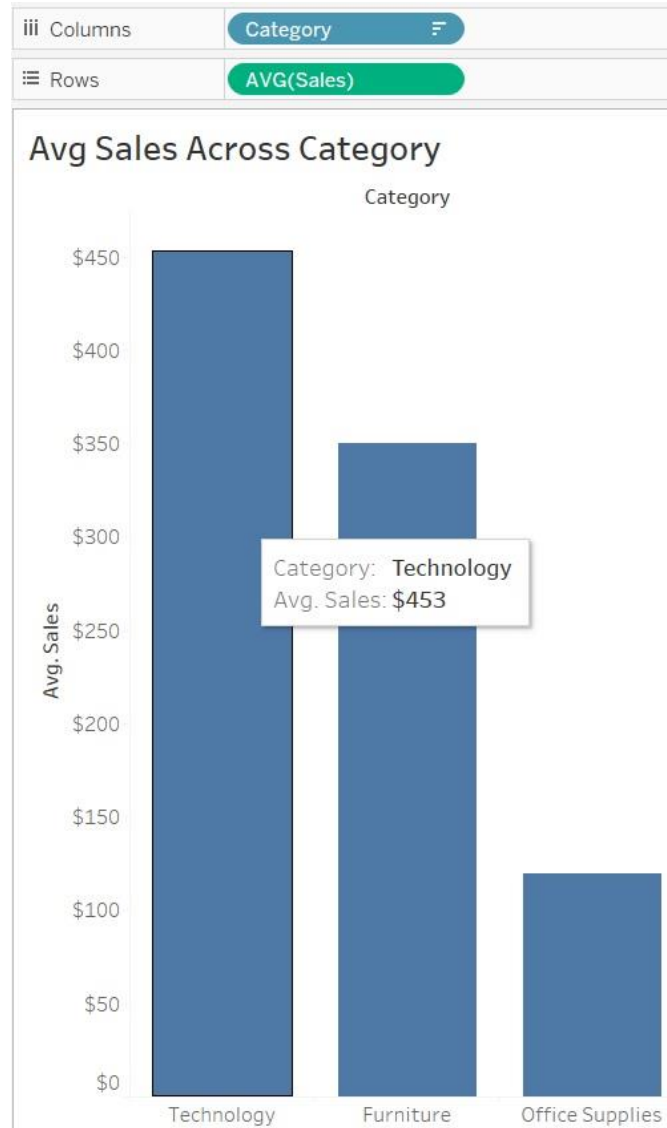

## STEP 2: Right-click the data field (i.e., **SUM(Sales)**)

### STEP 3: Select the required aggregation e.g.: "Average"

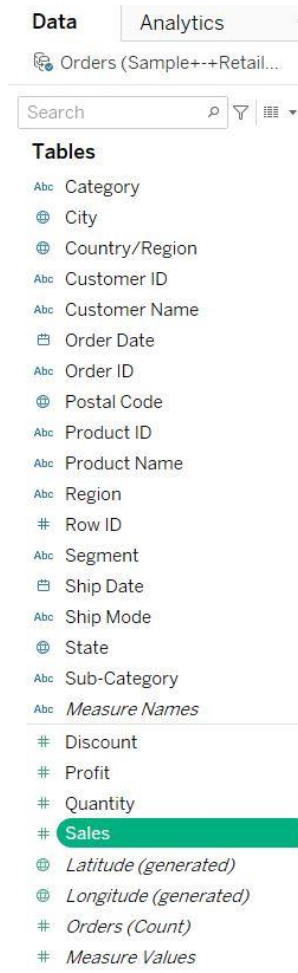

**STEP 4:** Ensure that the updated aggregation is visible in Rows/Columns of the view i.e., **AVG(Sales)**

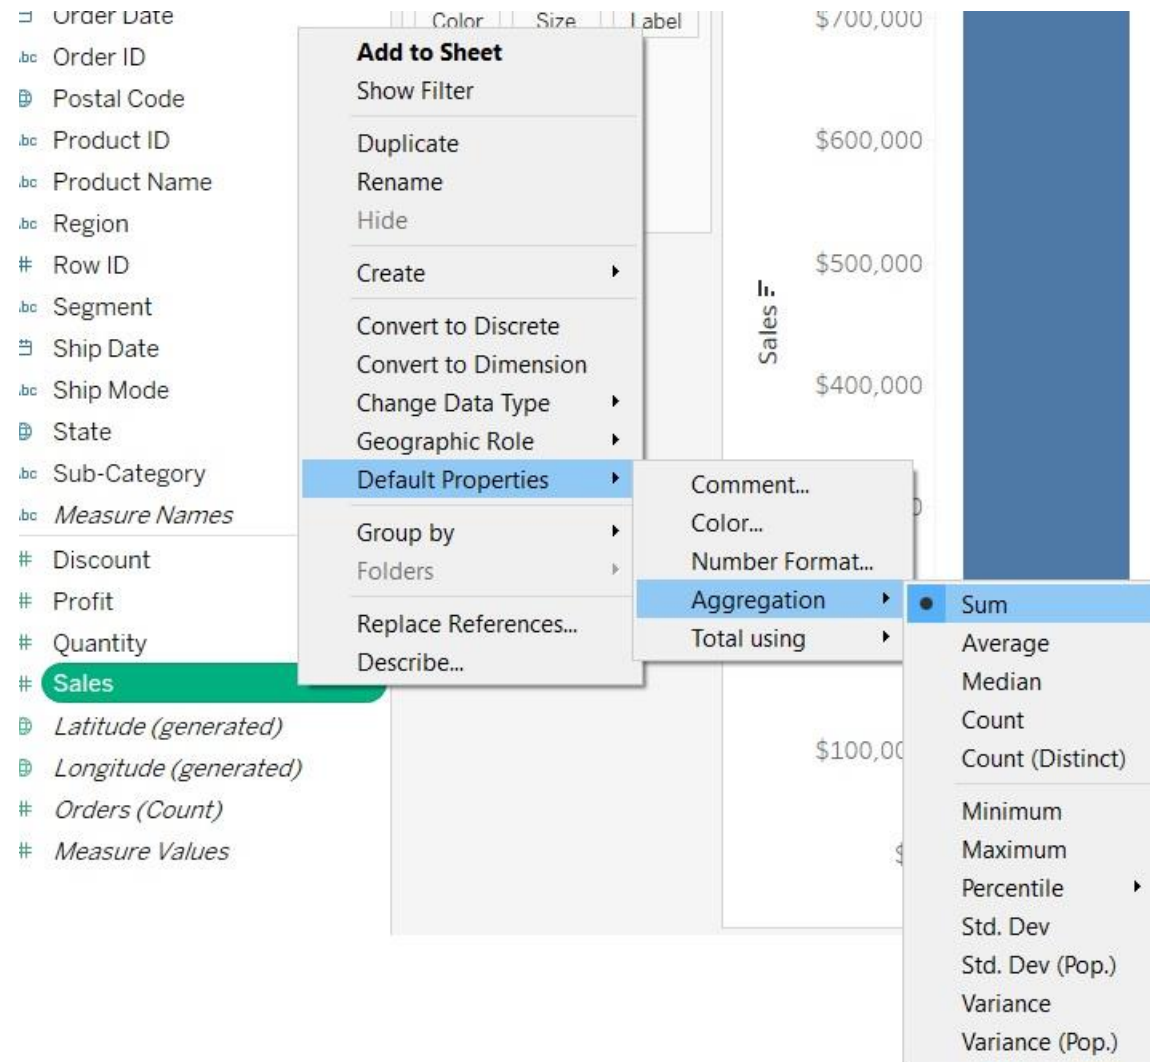

## METHOD-II: IN THE DATA PANE (BEFORE MAKING USE OF THE MEASURE IN EITHER ROWS OR COLUMNS OF THE VIEW)

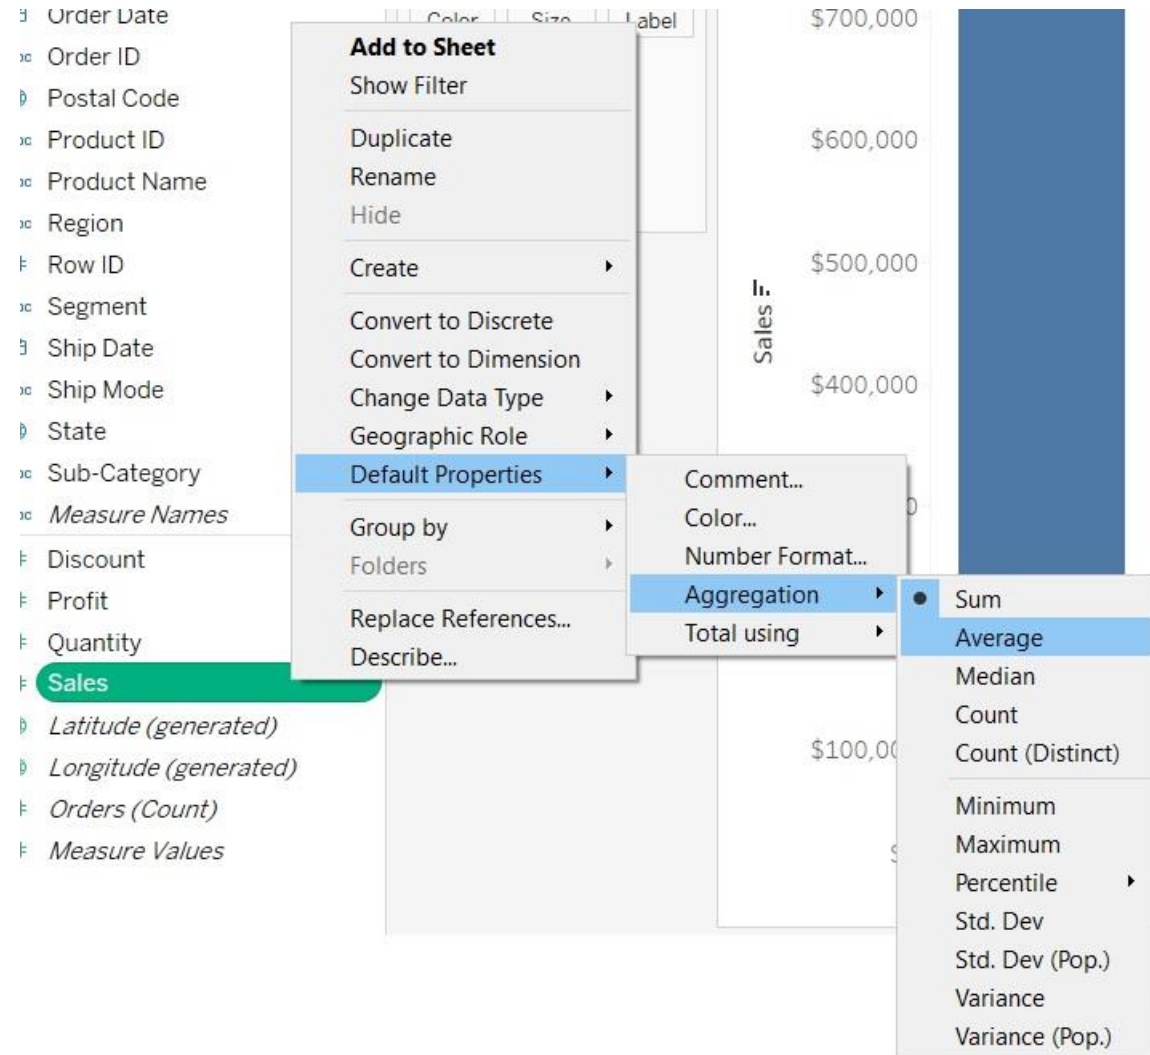

**STEP 1:** Select the measure for which the aggregation needs to be changed.

**STEP 2:** By default, the aggregation for sales will be **Sum**.

### STEP 3: Select the required aggregation e.g.: "Average"

**STEP 4:** If we make use of the Sales measure in a new view either in Rows or Columns the aggregation level will be the updated one i.e., **AVG(Sales)**

Columns	
Rows	AVG(Sales)
