

HOW TO REMOVE SORT ICON FROM WORKSHEET/VIEW

STEP 1: Assume that we have a **Bar Chart** of **Region Vs Sales**
The **Sort Icon** is visible in the middle of **Sales Axis**

HOW TO REMOVE SORT ICON FROM WORKSHEET/VIEW

STEP 2: Check the Show Sort Controls option under Worksheet

Go to **Worksheet > Show Sort Controls**

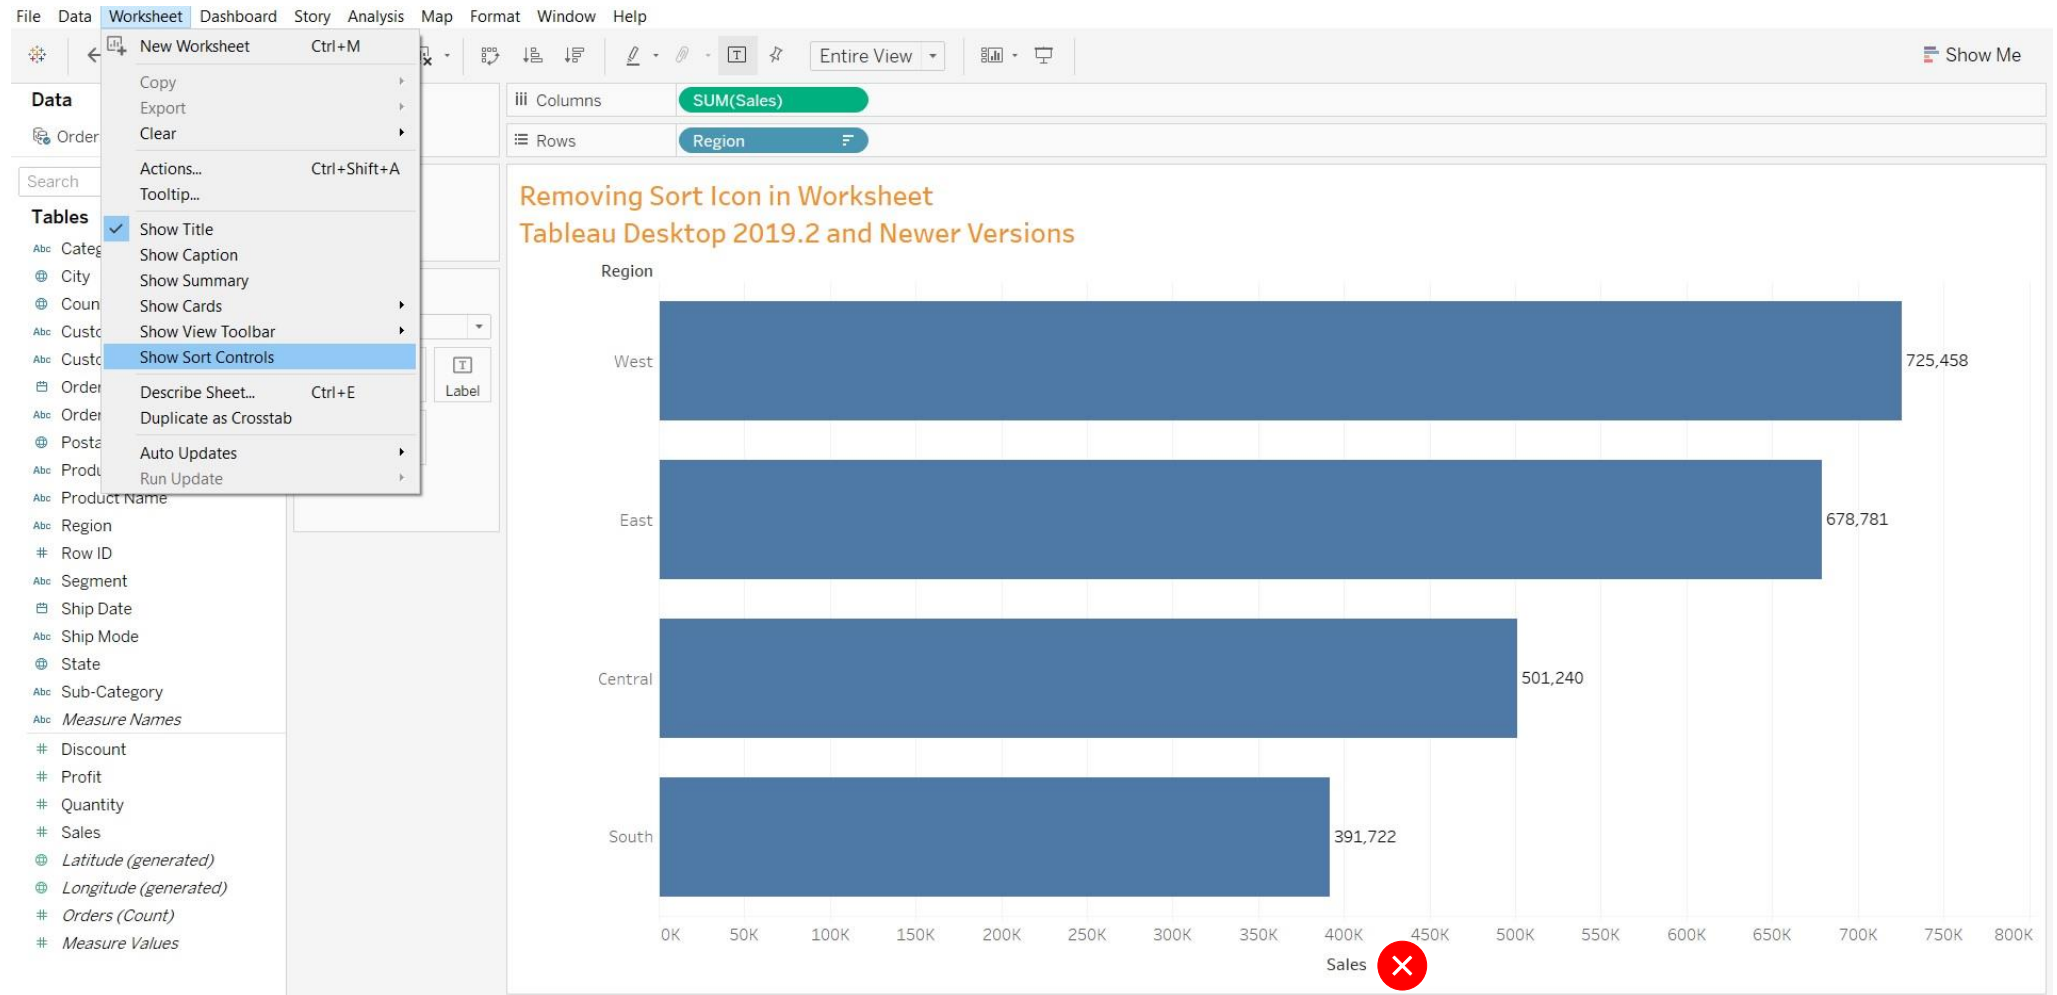

(Feature present from **Tableau Desktop 2019.2** onwards)

The screenshot shows the Tableau Desktop interface. The 'Worksheet' menu is open, and the 'Show Sort Controls' option is checked. The main view displays a horizontal bar chart titled 'Removing Sort Icon in Worksheet' with the subtitle 'Tableau Desktop 2019.2 and Newer Versions'. The chart shows sales data by region: West (725,458), East (678,781), Central (501,240), and South (391,722). The x-axis is labeled 'Sales' and ranges from 0K to 800K. A green checkmark icon is visible next to the 'Sales' label on the x-axis.

Region	Sales
West	725,458
East	678,781
Central	501,240
South	391,722

HOW TO REMOVE SORT ICON FROM WORKSHEET/VIEW

STEP 3: To remove the **Show Sort Controls** option uncheck it
Go to **Worksheet** > Uncheck **Show Sort Controls**

The screenshot shows the Tableau Desktop interface. The 'Worksheet' menu is open, and the 'Show Sort Controls' option is checked. The main view displays a horizontal bar chart titled 'Removing Sort Icon in Worksheet' for Tableau Desktop 2019.2 and newer versions. The chart shows sales by region: West (725,458), East (678,781), Central (501,240), and South (391,722). The x-axis is labeled 'Sales' and ranges from 0K to 800K. A red 'X' icon is visible over the 'Sales' label, indicating the sort icon has been removed.

Region	Sales
West	725,458
East	678,781
Central	501,240
South	391,722
