

METHODS TO ADD A NEW MEASURE TO AN EXISTING BLENDED AXIS VIEW

There are 3 methods to add a NEW measure to an existing Blended Axis view

Method-I: Drag and drop the NEW measure onto existing Axis

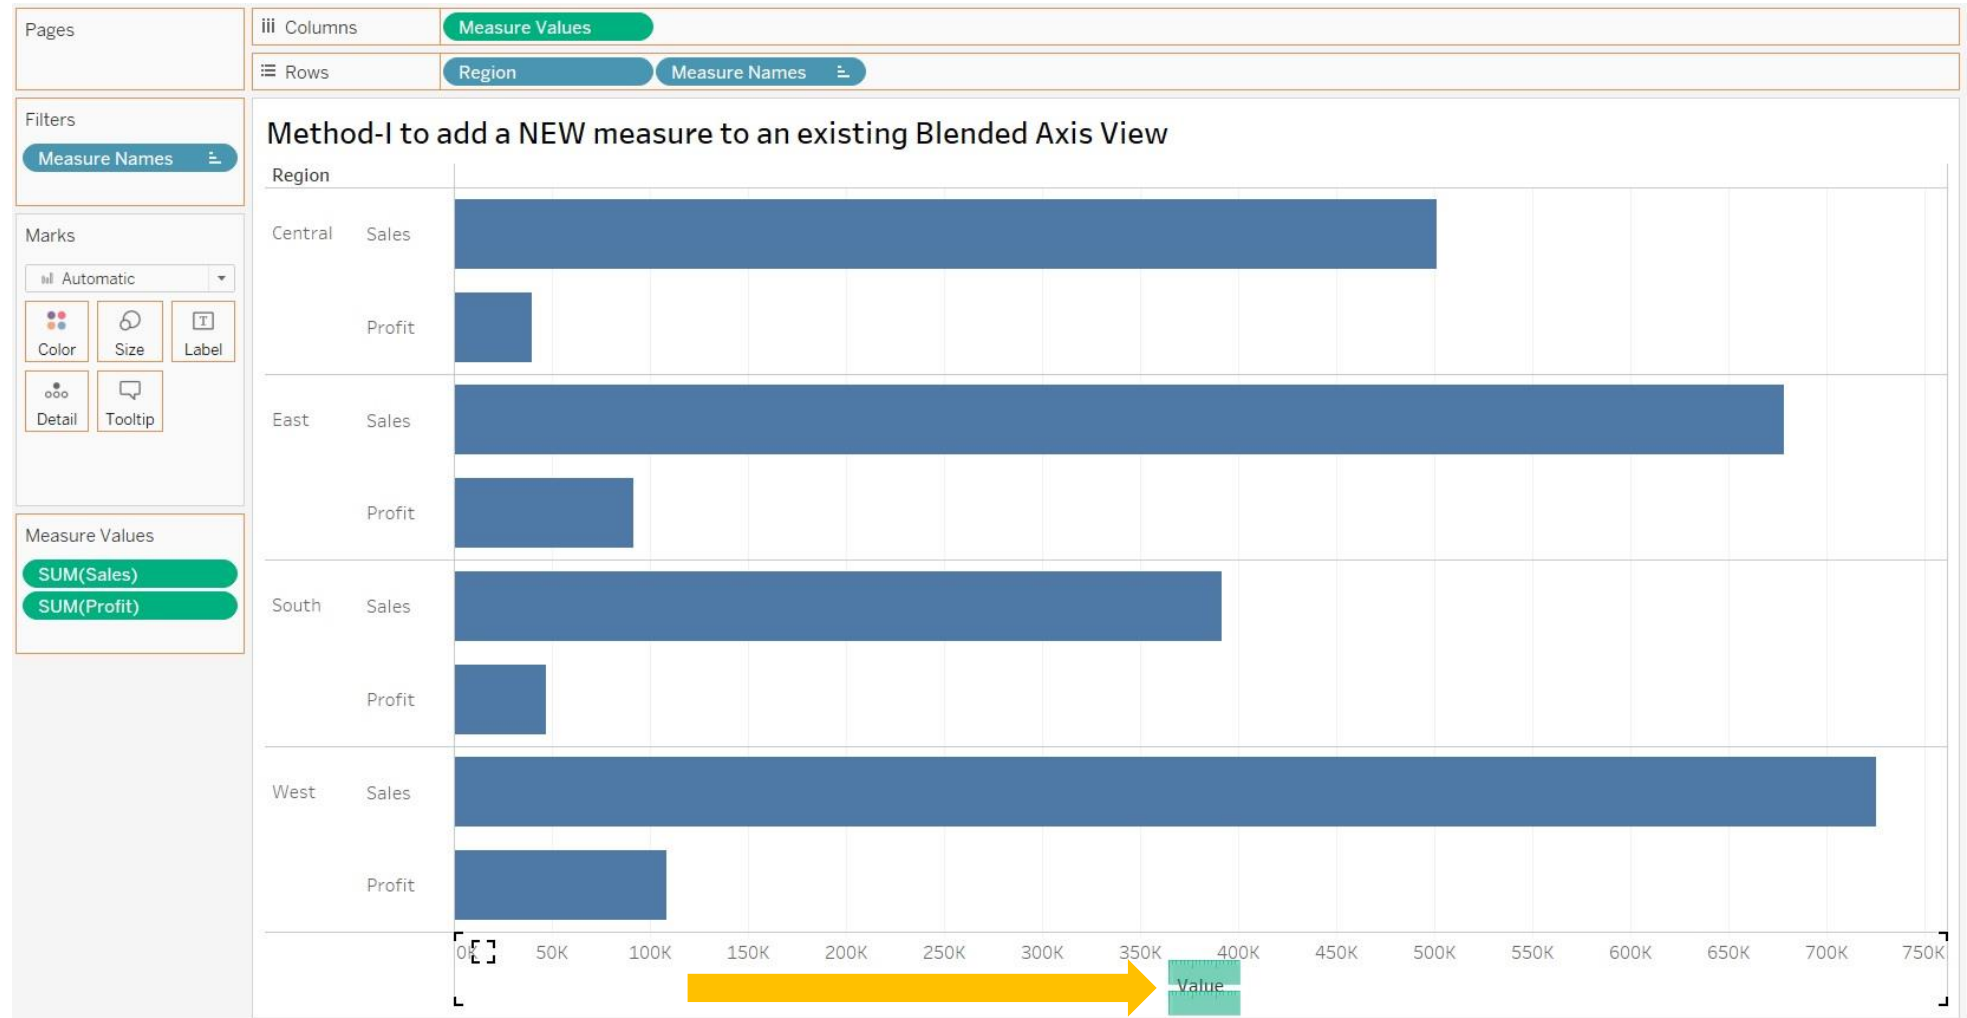

Method-II: Drag and drop the NEW measure to the **Measure Values** shelf

Method-III: Make use of the **Measure Names** in the **Filters** shelf to add the NEW measure

We will start with a Blended Axis view of **Sales/Profit Vs Region** and try to add **Quantity**

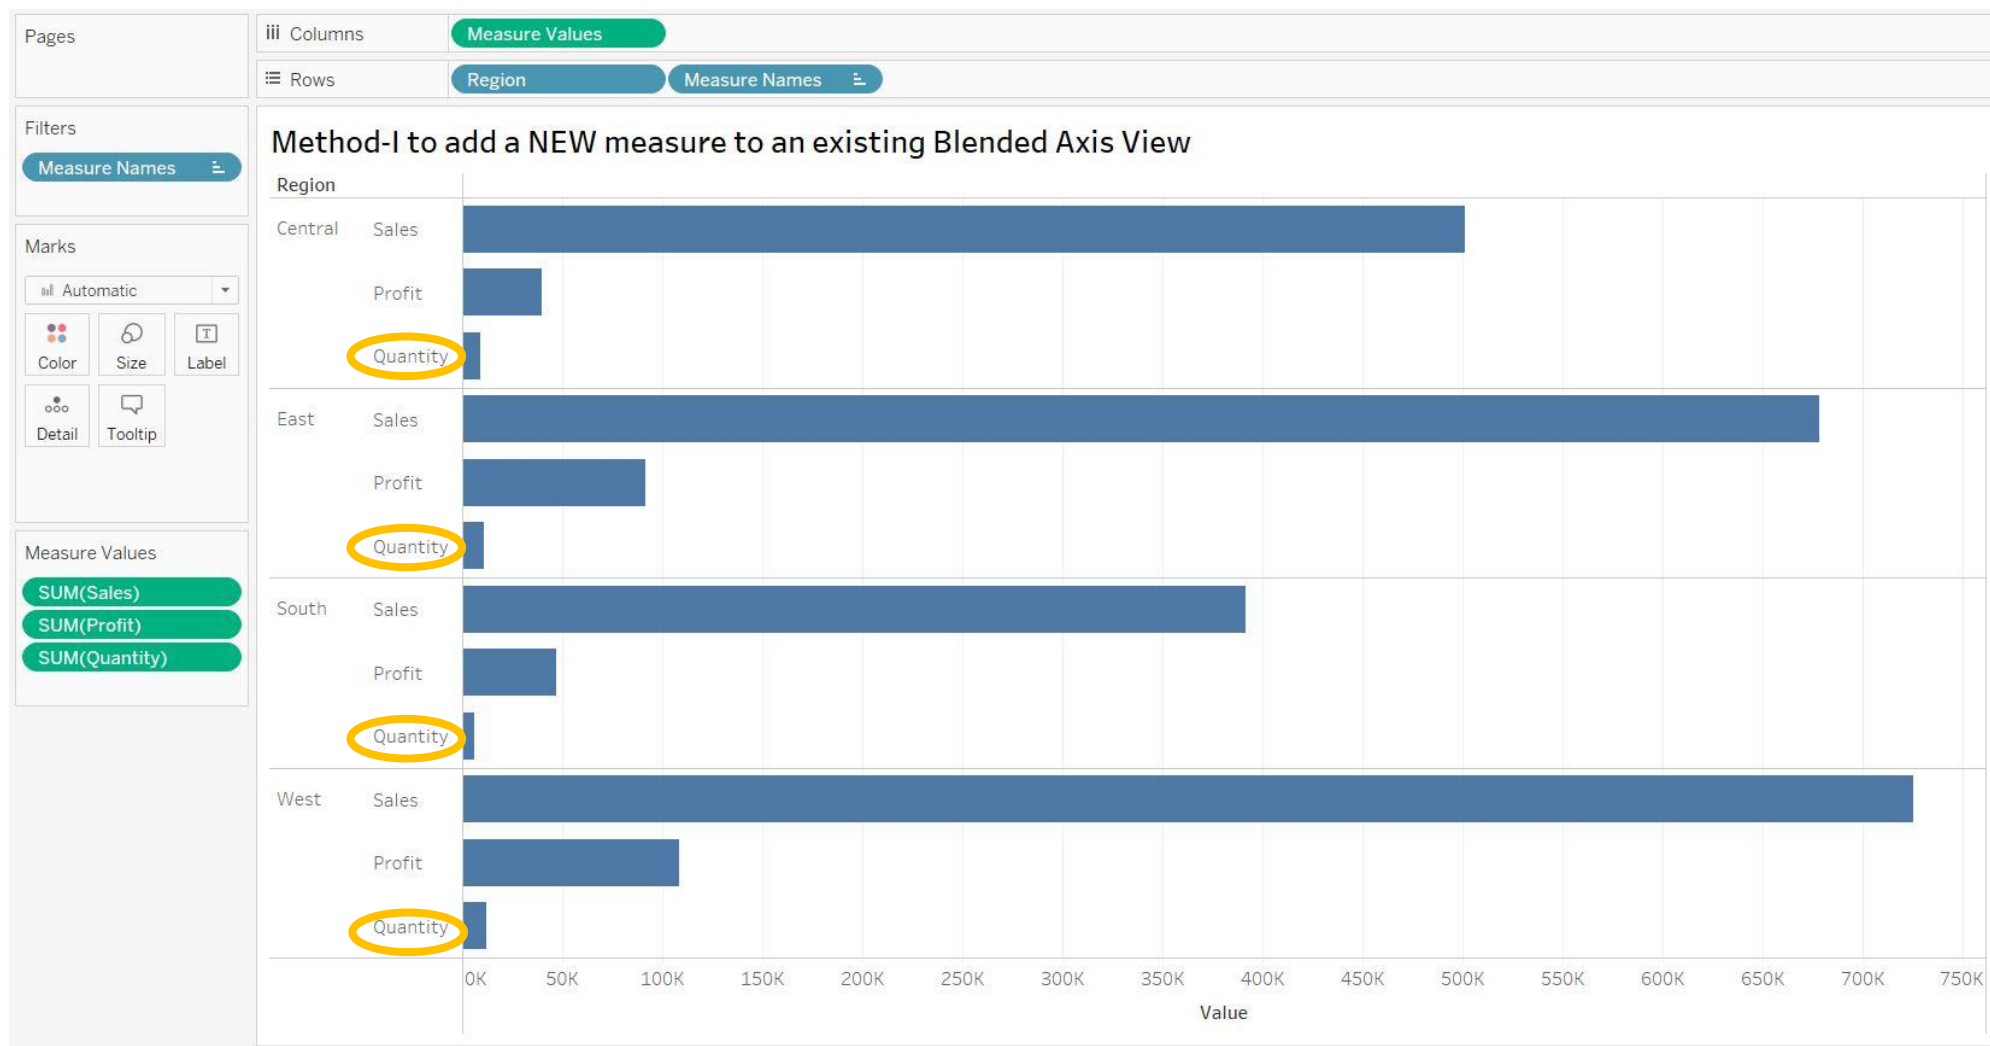

METHOD-I TO ADD A NEW MEASURE TO AN EXISTING BLENDED AXIS VIEW

Step 1: Drag and drop the new measure e.g: **Quantity** onto the existing Axis

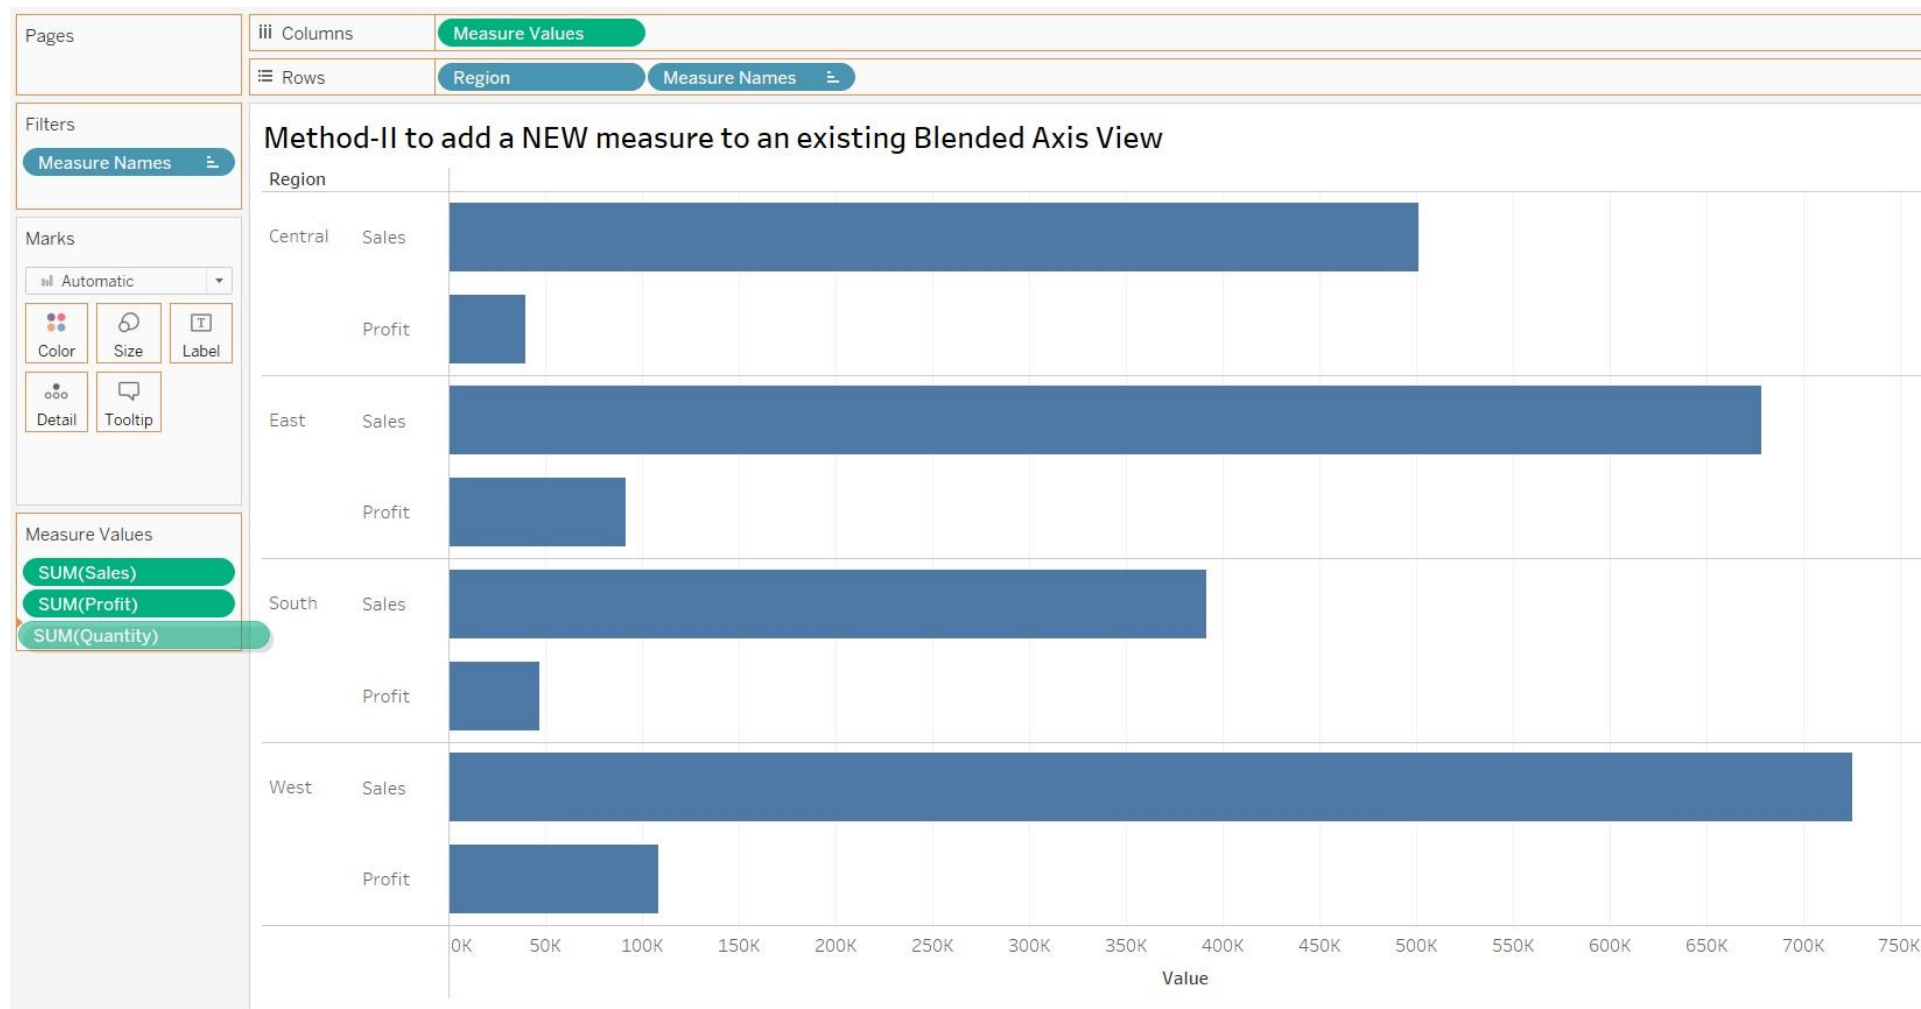

METHOD-I TO ADD A NEW MEASURE TO AN EXISTING BLENDED AXIS VIEW

Step 2: Now **Quantity** is also present in the view

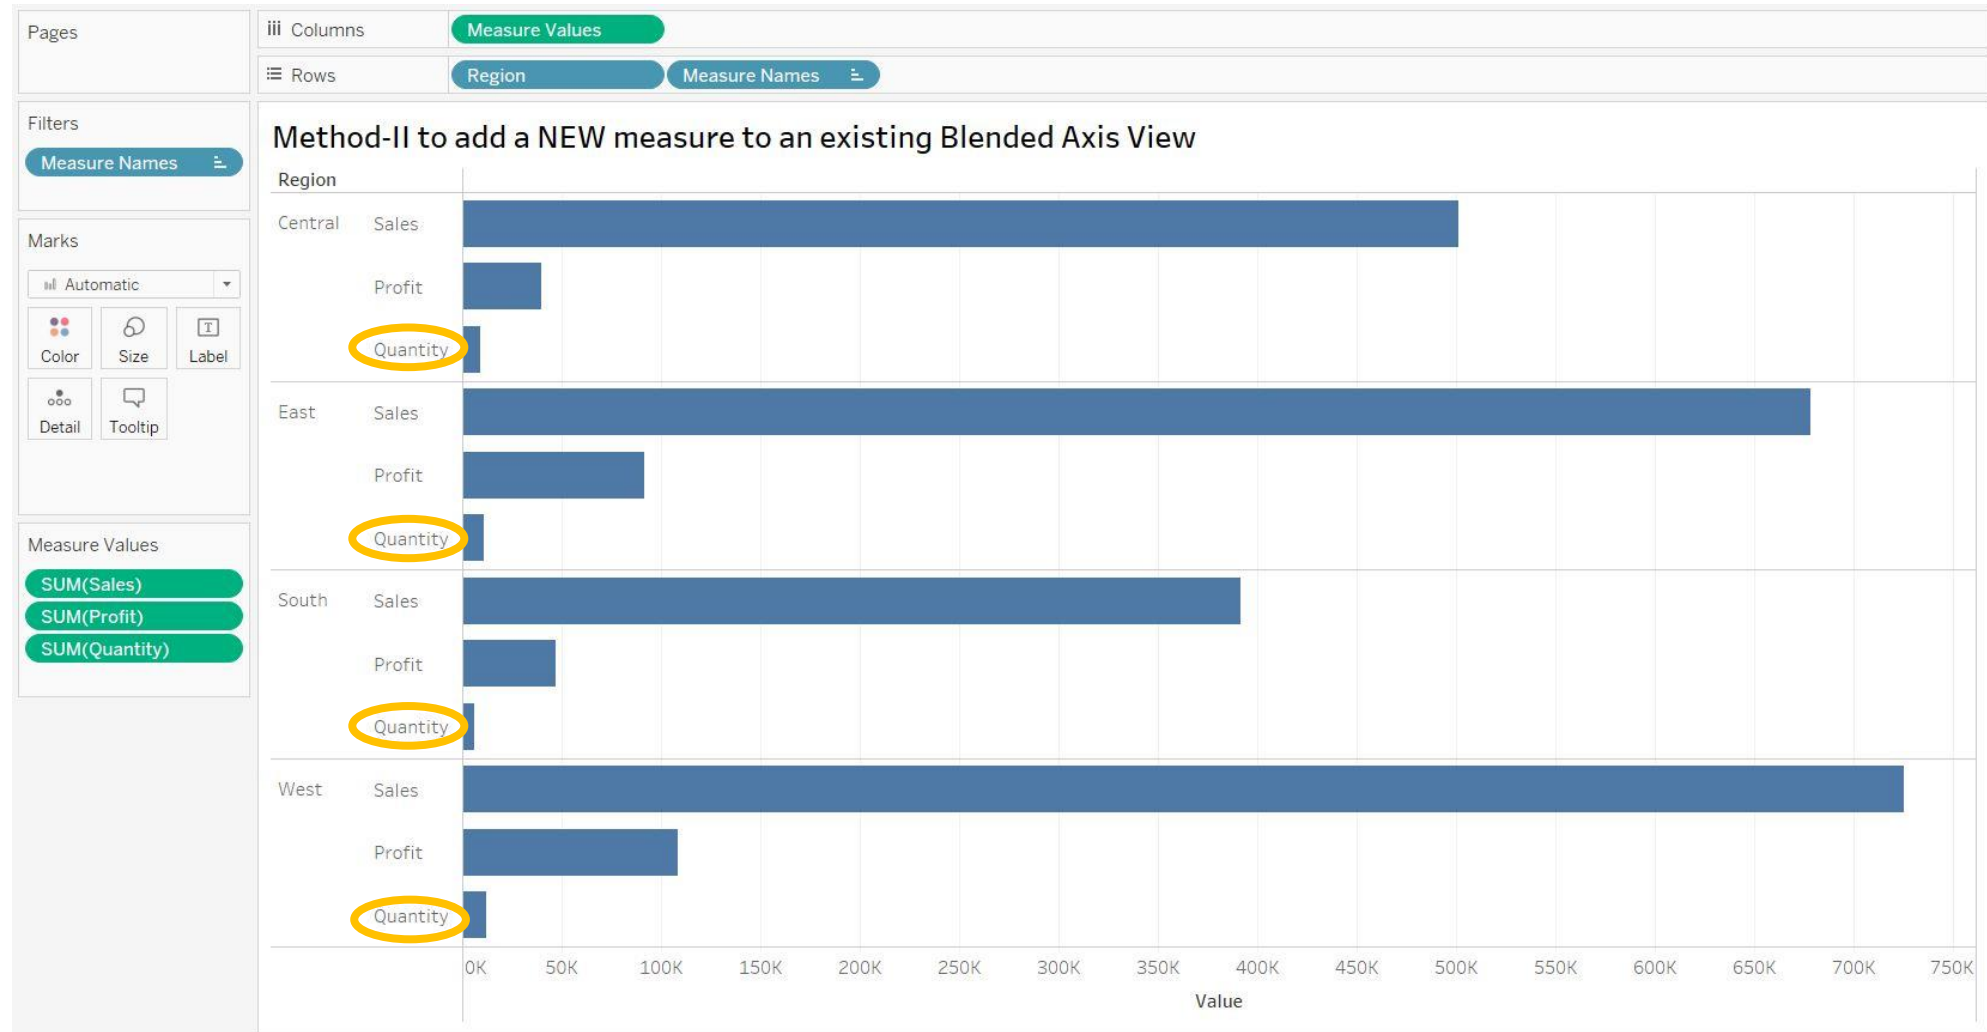

METHOD-II TO ADD A NEW MEASURE TO AN EXISTING BLENDED AXIS VIEW

Step 1: Drag and drop the new measure e.g: **Quantity** to the **Measure Values** shelf

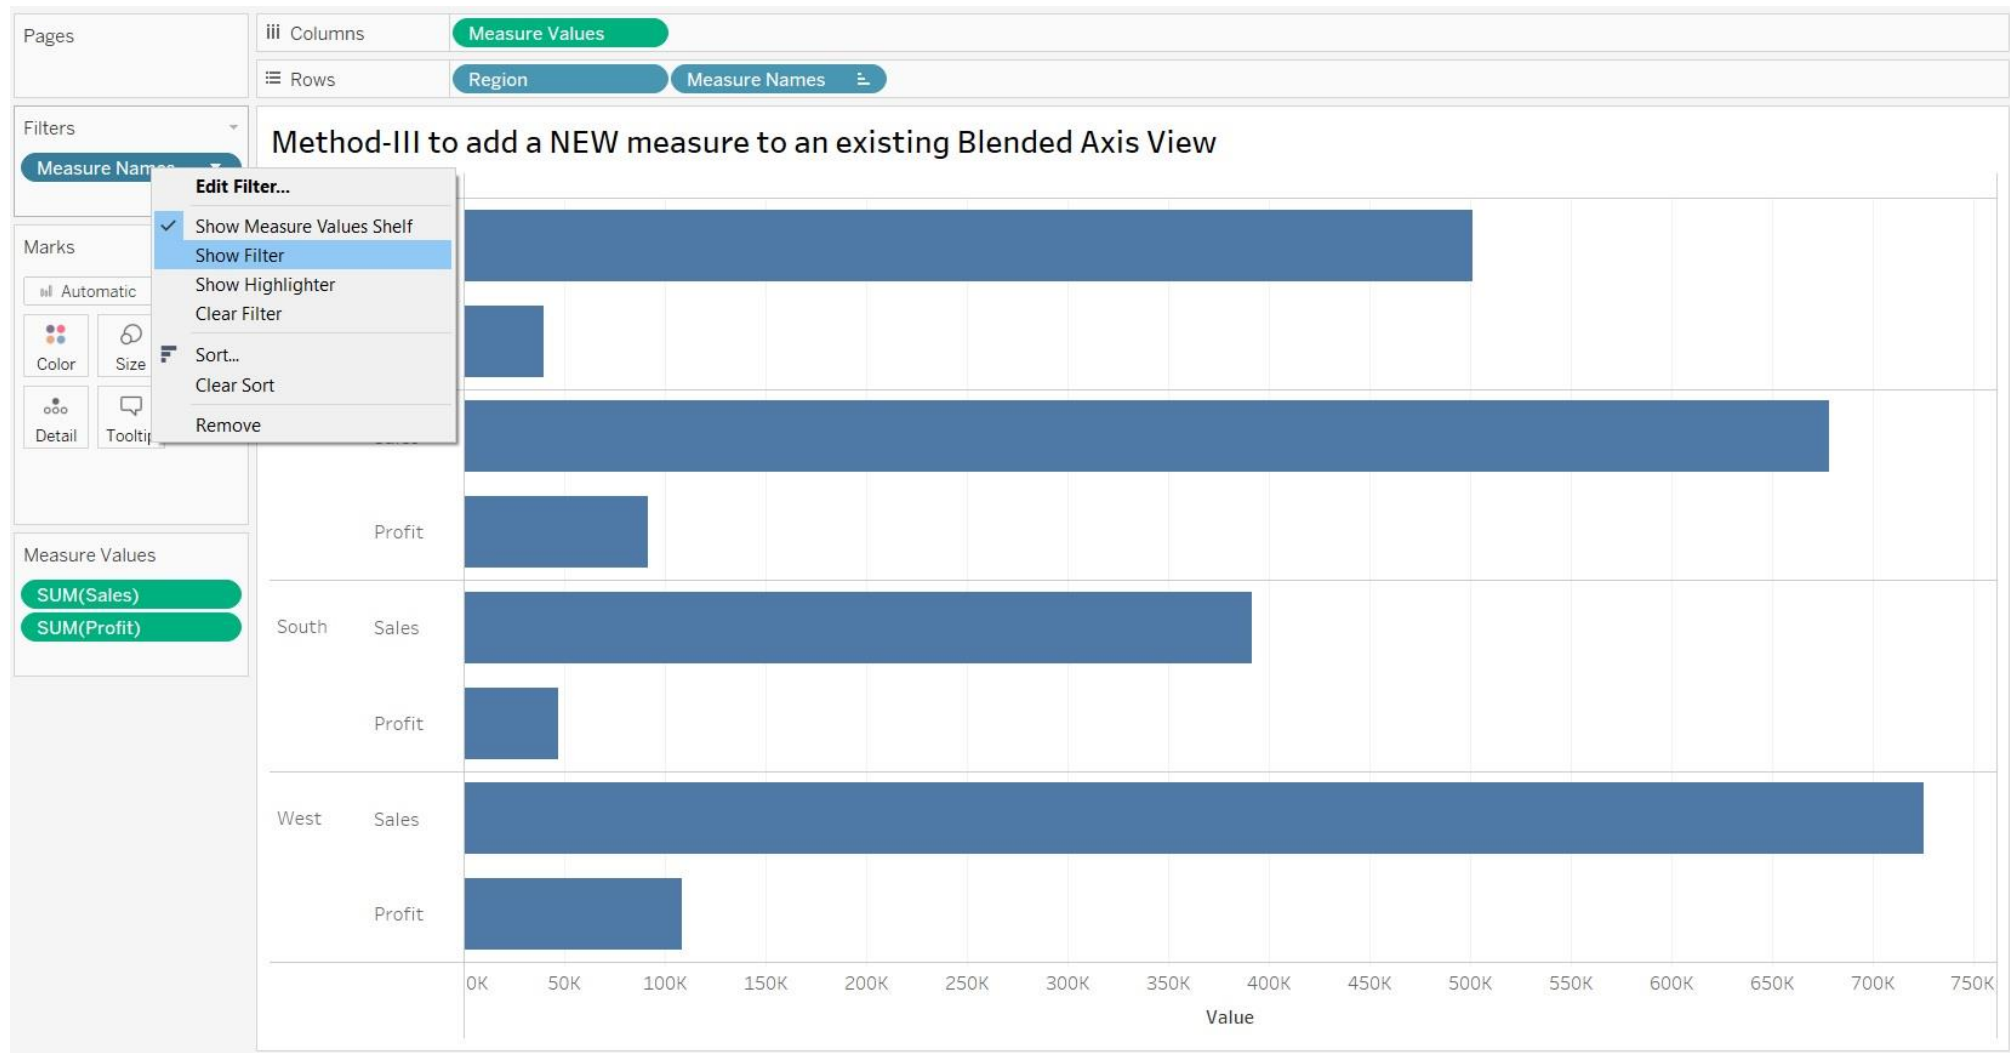

METHOD-II TO ADD A NEW MEASURE TO AN EXISTING BLENDED AXIS VIEW

Step 2: Now **Quantity** is also present in the view

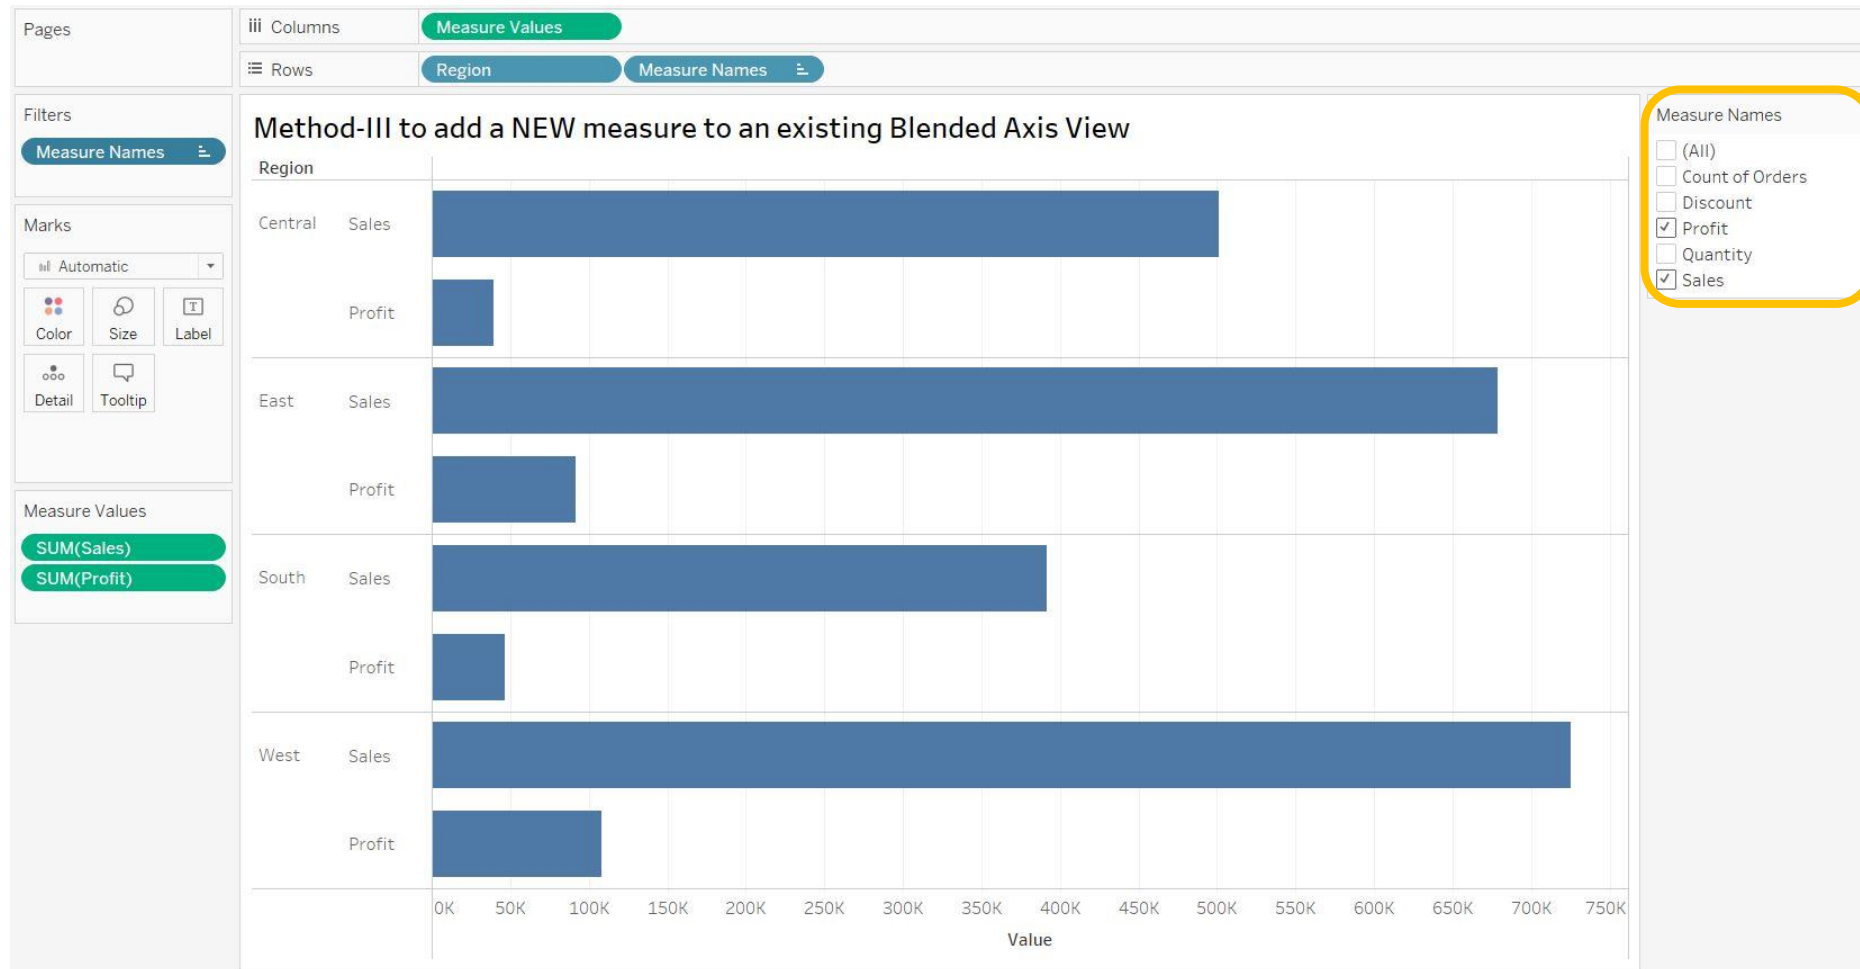

METHOD-III TO ADD A NEW MEASURE TO AN EXISTING BLENDED AXIS VIEW

Step 1: Right-click **Measure Names** on the **Filters** shelf, Select **Show Filter**

METHOD-III TO ADD A NEW MEASURE TO AN EXISTING BLENDED AXIS VIEW

Step 2: Now the filter control is visible for the **Measure Names** on the right side of the view

METHOD-III TO ADD A NEW MEASURE TO AN EXISTING BLENDED AXIS VIEW

Step 3: Select **Quantity** from **Measure Names** filter control
Now **Quantity** is also present in the view
