

EXTRACT HISTORY

In Tableau we can check the **Extract History** by using the below mentioned methods:

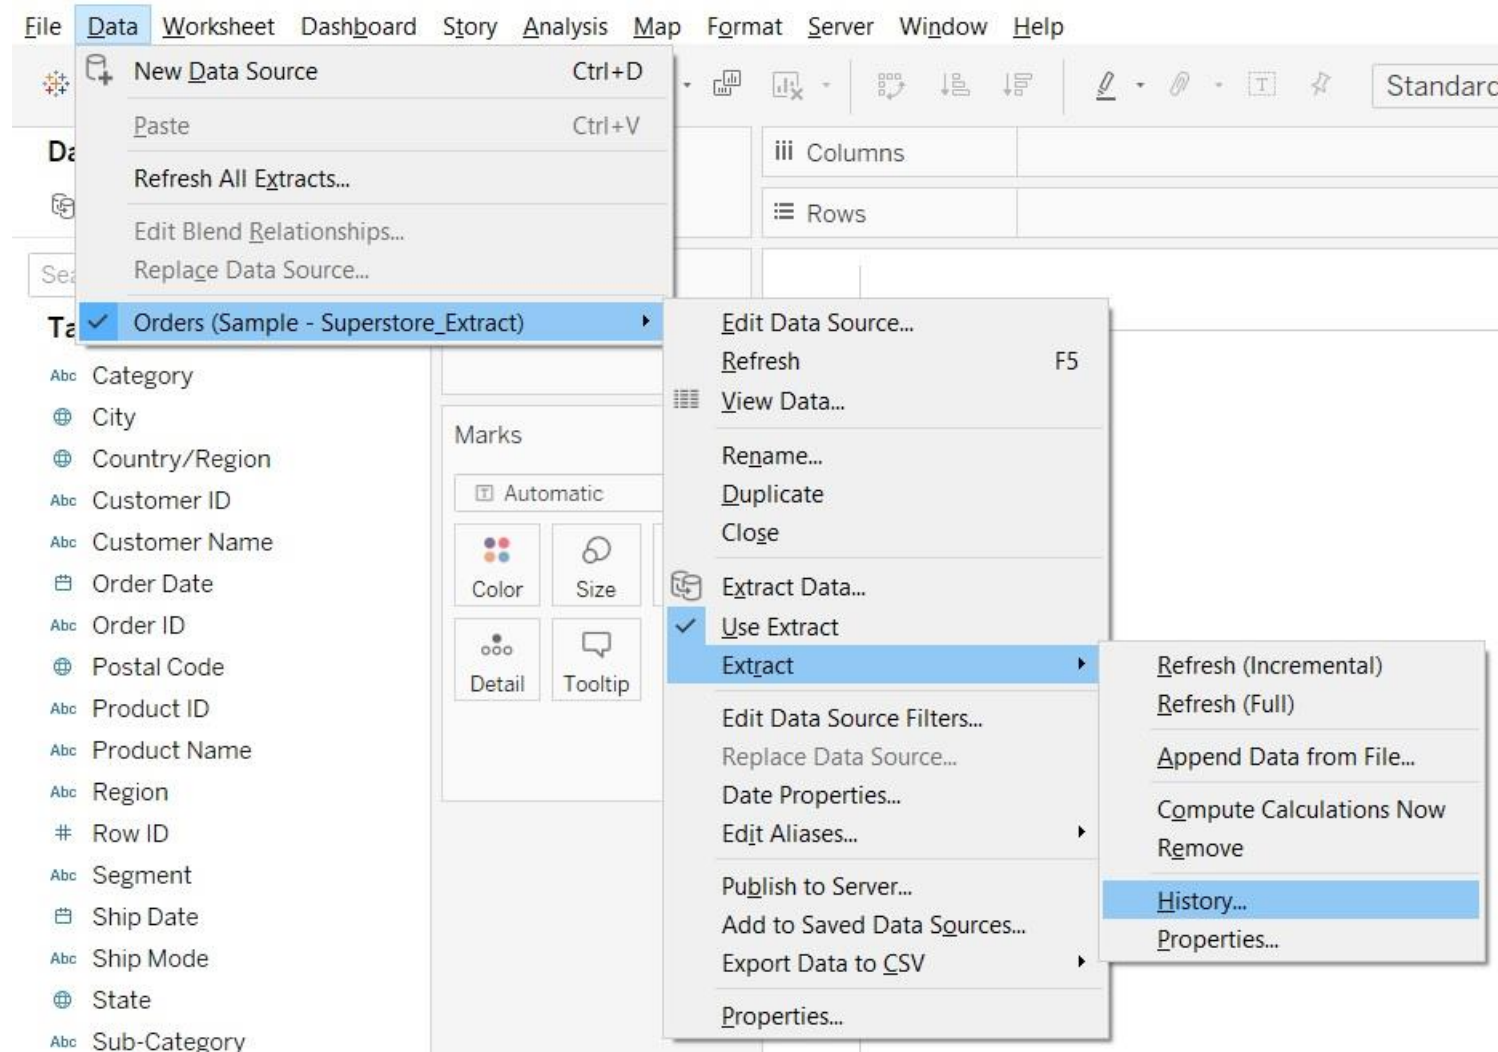

Method#1: Select the data source on the **Data** menu and then select **Extract > History**

Method#2: Right-click the data source, Select **Extract > History**

NOTE: This is possible only in **Tableau Desktop Professional Edition** and not in **Tableau Desktop Public Edition**

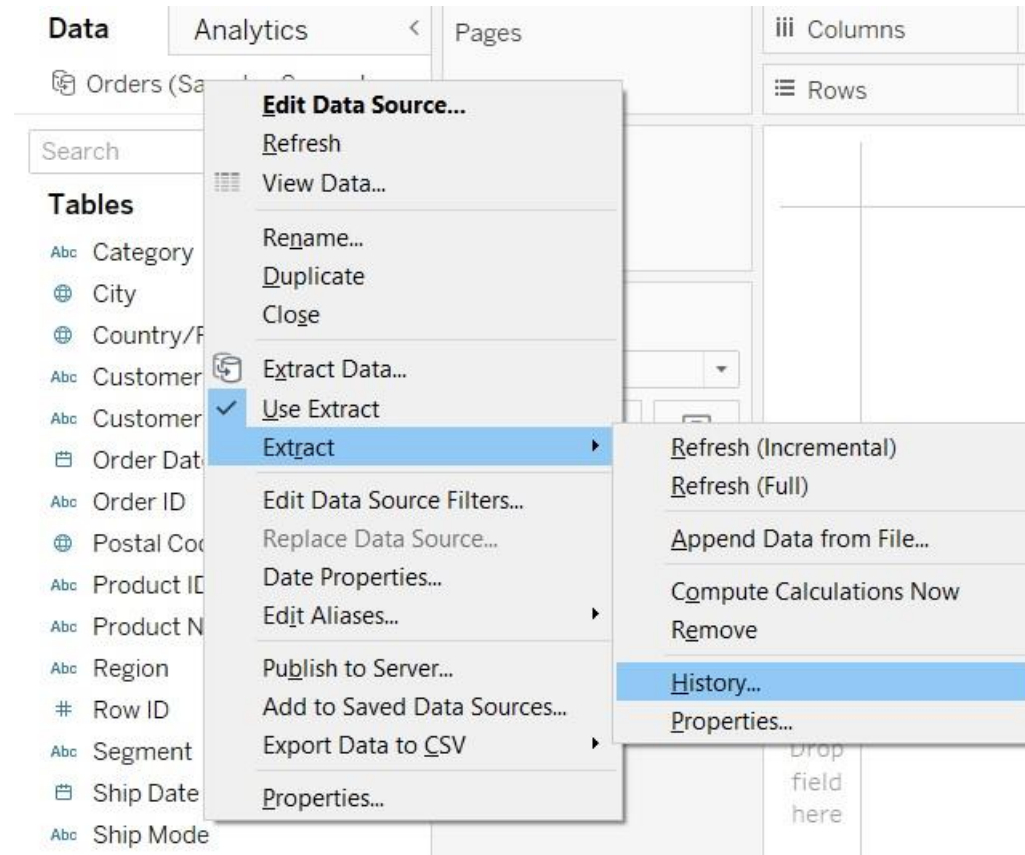

EXTRACT HISTORY

Method#1: Select the data source on the **Data** menu and then select **Extract > History**

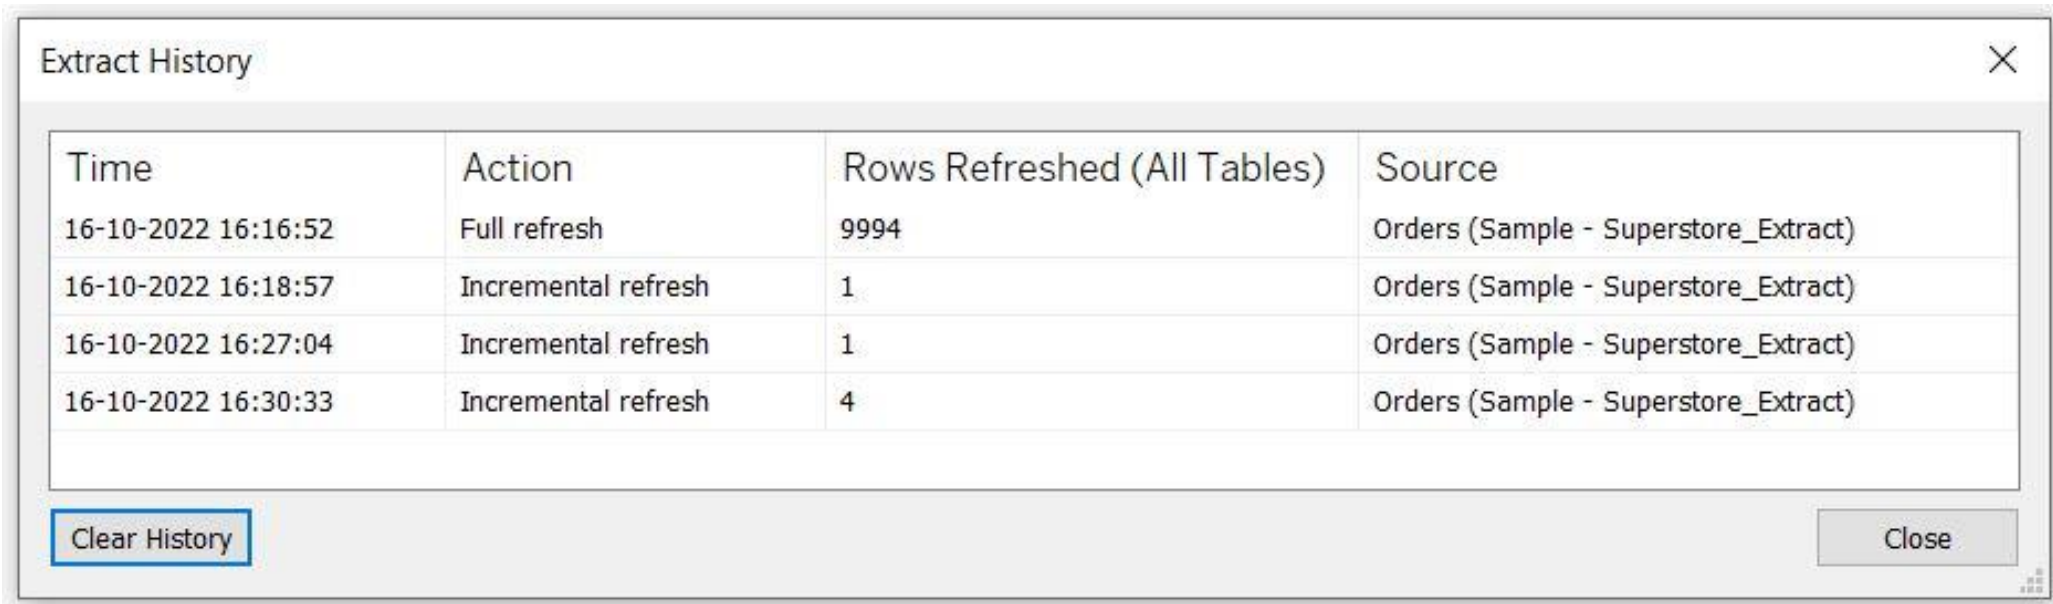

EXTRACT HISTORY

Method#2: In the **Data** pane, Right-click the data source, Select **Extract > History**

EXTRACT HISTORY

For both methods we will get the below mentioned **Extract History** dialog box

The image shows a screenshot of a software dialog box titled "Extract History". It features a table with four columns: "Time", "Action", "Rows Refreshed (All Tables)", and "Source". The table contains four rows of data. At the bottom left of the dialog is a "Clear History" button, and at the bottom right is a "Close" button. The dialog box has a standard window border with a close button (X) in the top right corner.

Time	Action	Rows Refreshed (All Tables)	Source
16-10-2022 16:16:52	Full refresh	9994	Orders (Sample - Superstore_Extract)
16-10-2022 16:18:57	Incremental refresh	1	Orders (Sample - Superstore_Extract)
16-10-2022 16:27:04	Incremental refresh	1	Orders (Sample - Superstore_Extract)
16-10-2022 16:30:33	Incremental refresh	4	Orders (Sample - Superstore_Extract)

In the **Extract History** we can see when the details of all the extracts that were created namely the type of refresh carried out (Full or Incremental), Rows Refreshed, Data Source Name and Time.
